

InSite is a comprehensive cost savings analysis, encompassing every area our containers come in contact with your operation.

InSite Analysis Checkpoints include:

- **e-business:** Our e-business capabilities include document sharing, collaboration, order management tools, inventory and financial information. Let us demonstrate how they can work for you.
- **Graphics:** Temple-Inland's Graphics Resource Center is the only full-service pre-print facility under one roof. Our graphics pros understand market demands and respond with preprint solutions that work for your bottom line.
- **Package optimization:** Our designers continually seek ways to improve packaging for our customers, through reconfiguring and testing; finding less costly board grades and through consolidation of packages and SKU reduction.
- **Packaging systems:** Temple-Inland boasts a highly experienced Packaging systems group and the most extensive packaging equipment library in the industry; they understand your equipment and how to maximize its effectiveness.
- **RFID:** When you're ready to move into RFID, we're ready to partner with you to make your transition as successful as it can be.
- **Supply chain enhancement:** If you're facing external warehousing issues, JIT or even supplier diversity or tracking and replenishment challenges, we can help you find efficiencies and cost savings.
