

The Temple-Inland **Solid Fibre**

Advantage

service. quality. innovation

TempleInland

The Solid Fibre advantage delivered by an *industry leader*.

Temple-Inland is a leading provider of services and products designed to help marketers move their goods safely, efficiently and effectively. Today, Temple-Inland ranks third among producers of corrugated containers and fourth among linerboard producers in the United States, with a network of over eighty packaging plants, paper mills and specialty facilities throughout North America.

Customer-focused solutions

Temple-Inland's nationwide network of facilities delivers seamless, one-step sourcing to our customers throughout North America. The company's decentralized, regional structure allows enhanced capabilities and products to be delivered with increased responsiveness and unmatched service and support coast to coast – and beyond.

Quality from the inside

Temple-Inland's Bogalusa, Louisiana, Solid Fibre and corrugated manufacturing facility is strategically located adjacent to our own world-class mill – assuring a constant supply of quality raw material. This state-of-the-art 400,000 square foot converting facility was constructed in 1998 and is fully ISO 9002 certified. Product consistency and accuracy are assured by the company's own stringent Temple-Inland Quality Process, while material testing and verification are performed by Temple-Inland's ISTA accredited Testing Solutions Lab in Indianapolis.

Advantage: Solid Fibre

Solid fibre slip sheets are manufactured of durable virgin kraft linerboard and are ideal low cost replacements for wooden pallets for virtually all shipping and storage needs. Our Solid Fibre sheets range in nominal caliper from .030" to .100", and are manufactured by laminating up to 4 plies of varying grades of linerboard.

Manufacturing custom solutions

Because your product, procedure and environment may be unique, our slip sheets are custom made in varying sizes, designs, densities and materials. Whatever your demands, Temple-Inland Solid Fibre sheets can be designed to meet them.

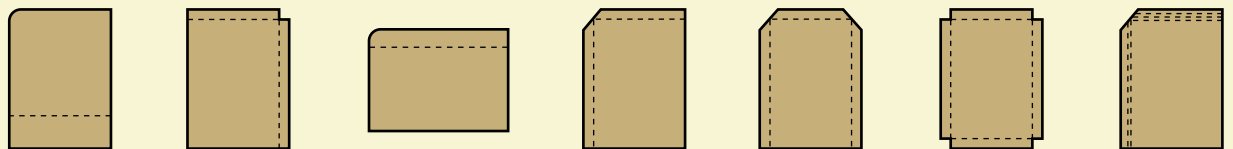

The customer evaluation

Have an Temple-Inland Solid Fibre executive analyze your operation. We'll evaluate factors such as unit load weight, handling ratio and your space requirements. The end result? Slip sheet size, thickness and design that match your requirements – custom designed to make your operation more profitable.

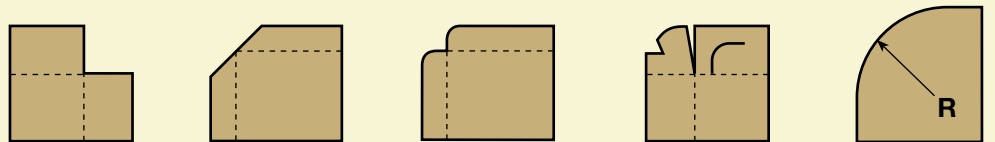

Move more product -- more profitably

Temple-Inland Solid Fibre solutions are cost effective, safe and smart! Contact your Solid Fibre executive to schedule a review of your slip sheet application.

Corner design variations

A single source, many solutions

Solid fibre slip sheets are just one of our many product offerings. Our Bogalusa facility manufactures an entire array of Solid Fibre solutions including pallet pads, tier sheets and durable cartons and containers. Because Solid Fibre is moisture resistant and offers extremely high tensile strength to resist tearing and puncturing, it is ideal for durable packaging needs such as reusable or returnable packages.

Custom designed tier sheets from Temple-Inland are the ideal and cost-effective solution for a variety of applications. Manufactured to stringent quality standards, these re-usable sheets stack up nicely compared to the competition. In addition, Temple-Inland keeps a number of standard sized tier sheets in stock and available for immediate delivery.

Cost effective. Safe. Smart.

Lower cost: Solid fibre slip and tier sheets are substantially lower in cost compared to wood products for similar functions.

Safety concerns: Weighing less than 5 pounds, Solid Fibre sheets cause less back strain and eliminate all splinter and nail injuries.

Storage/freight savings: Up to 100 Solid Fibre sheets can be stored in the space taken by a single wooden pallet. More product per unit equals lower per unit shipping!

Product integrity: Without nails or loose boards to damage your product, you'll reduce damage claims and customer inconvenience.

Recyclability: Unlike pallets which can be difficult and expensive to dispose, you can get paid when recycling 100% recyclable linerboard slip and tier sheets.

High Performance Linerboard

Solid fibre slip sheets from Temple-Inland are custom designed for each application, assuring that you get the strength you need, when you need it. High Performance Liners – sheets that deliver higher tensile strength – are available in situations where load and weight factors require it.

Lower shipping, storage and purchase costs

Line efficiency... Automated unitizing systems... export shipments... these are the issues that concern today's manufacturers. Whether you are a small, single facility, or an industry giant with global capabilities, the bottom line is it makes sense to utilize Solid Fibre slip sheets from Temple-Inland.

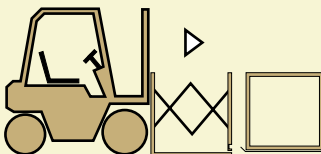

Distribution efficiency

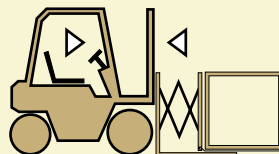

Temple-Inland understands that in today's demanding area of manufacturing and distribution, operational efficiency is the key to a successful bottom line.

Lower shipping costs...Reduce injuries and liability...Lower damage claims... Solid Fibre solutions from Temple-Inland can give your operation a competitive advantage.
